

LESSON PLAN

Date/Time: March 26, 2026, 03:00PM

I. Objectives

At the end of the lesson, the students should be able to:

- a. Identify the criteria used in assessing student portfolios.
- b. Understand the importance of completeness, reflection, creativity, and organization.
- c. Explain how teachers summarize results using scores, percentages, tables, or graphs.

II. Introduction

Portfolio assessment is a method used to evaluate students' learning, progress, and achievements through a collection of their work. It helps teachers see how students develop their skills over time using criteria such as completeness, reflection, creativity, and organization.

III. Motivation - “Never Have I Ever”

- Listen: The teacher reads a “Never Have I Ever” statement about portfolios.
- Respond: Raise your hand if you have done analyze the question
- Reflect: Share a quick thought about your experience or what you learned.

IV. Lesson Proper

A. Quantifying Results from Portfolios

A portfolio is a purposeful collection of student work showing progress and achievement. Students select their work and include self-reflection.

B. Criteria in Assessing Portfolios

- Completeness – All required outputs are included.
- Reflection – Shows learning, strengths, and improvements.
- Creativity – Displays originality
- Organization – Well-arranged with labels and table of contents

LESSON PLAN

Date/Time: March 26, 2026, 03:00PM

C. Example

A good portfolio includes complete tasks, reflections, labeled drafts and final outputs, and a clear table of contents.

D. Guidelines in Giving Qualitative Feedback

- Be specific and targeted
- Show student progress
- Give timely feedback
- Provide opportunities for practice

E. Summarizing Results

- Type of Scores: scores, percentages, averages, transmuted grades
- Presentation: tables or graphs

V. Activity

Students evaluate a sample portfolio using the given criteria.

VI. Assessment

Direction:

1. What is a portfolio?
2. Give two criteria in assessing portfolios.
3. Why is reflection important?
4. How are results presented?

VII. Conclusion

Portfolio assessment effectively measures students' progress using clear criteria. It helps teachers give meaningful feedback and present results through scores or graphs while encouraging students to reflect and improve.
